

It's a fact. Clinton Pediatric Equipment is among the best in the medical equipment business for innovation, design superiority, breadth of line and durable performance. And surprisingly enough, it is among the most affordable.

Our *Clinton Kids™* products feature exclusive graphics. Designed by Clinton illustrators, these colorful graphics create a comfortable, kid-friendly environment for children of all ages.

Completely coordinated. Completely cost effective. Completely easy.

Clinton has done the design work for you with our total designed exam room solutions — *Clinton Complete*. Clinton Complete provides package pricing on the purchase of specific tables and coordinating cabinets.

Add coordinating graphics and accessories to achieve a total *Clinton Complete* look.

Look for *Clinton Complete* designed solutions throughout this catalog.

We invite you to examine our products. Imagine the possibilities, and select the equipment, from the one source that is committed to your pediatric needs.

IMPORTANT NOTE TO DISTRIBUTORS DOING BUSINESS IN CALIFORNIA:

Clinton Industries products drop shipping or to our knowledge being reshipped into California will carry appropriate Safe Harbor Warnings in compliance with California Proposition 65.

For more information on California Proposition 65, go to: www.P65Warnings.ca.gov

Scale Pals can expose you to chemicals, including vinyl chloride, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

Weighing a Patient

1. Place the patient on the scale platform.
 2. The indicator will automatically turn on and display the weight.
 3. The indicator will beep and hold the weight on the display until the scale automatically shuts off.
- NOTE:** If the scale does not automatically turn on, remove the patient and press zero.

IMPORTANT:

- The entire exam table top is part of the scale. Leaning against or touching the table top while weighing a patient will result in weight errors. If the top was compromised during weighing, press the REWEIGH button to get another readout.
- If the patient on the table is moving and cannot remain reasonably still, an inaccurate readout may occur, press the RE-WEIGH button to weigh the patient again.
- When using the storage compartment located on the top left side of the cabinet, take care that items are not in contact with underside of the top. This is part of the scale and may result in inaccurate readout.

Using the Infantometer

Clinton Scale tables are equipped with a handy infantometer that is also very simple to use. The ruler has centimeters on top and inches on the bottom for your convenience.

1. If not already locked into position, lock the left paddle to the left edge of the ruler. The left end factors in the length of the slider so the protruding paddle is always zero.
2. Gently place the infant between the paddles.
3. Gently slide the right paddle along the ruler to the infant's feet.
4. The red arrow on the right paddle indicates the accurate length of the infant, factoring in the width of the slider.
